

# Case Studies of Projects Using **POWER BI**

**PROJECT NAME :**  
**Power BI Development -**  
**View Status (Daily**  
**Report)**

**DURATION: NOV TO FEB 2023**

**DATABASE: MSQL**

**TOOL: POWER BI**

# Project Requirement:

To manage and gather employee data and their reports according to their performance on day to day basis.

# **Challenge :**

---

Data was scattered and wasn't well managed In the database .

# **Solution Offered:**

---

- Azure API Data Source connect throw PowerBI, using KQL in Azure API convert to M-Query in Power BI Transform data.
- Daily Refresh Data
- User Function - Based on manager login he/she wants to know their employee's view/clicks per data.

# Project Name :

# **TMA Dashboard**

---

**CLIENT: CONFIDENTIAL**

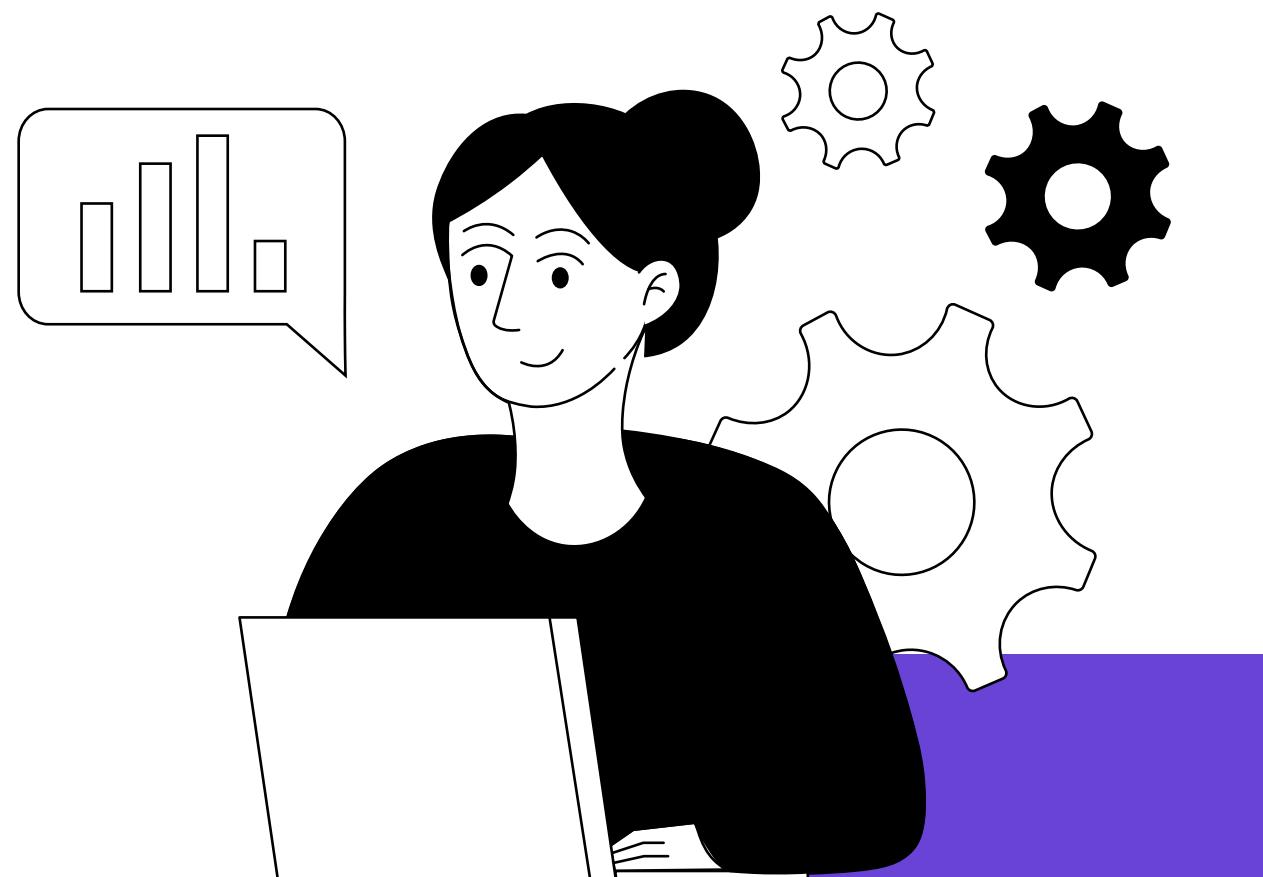

---

**DATABASE: EXCEL, MSSQL, POWER BI**

---

**TOOLS: POWER BI**

---

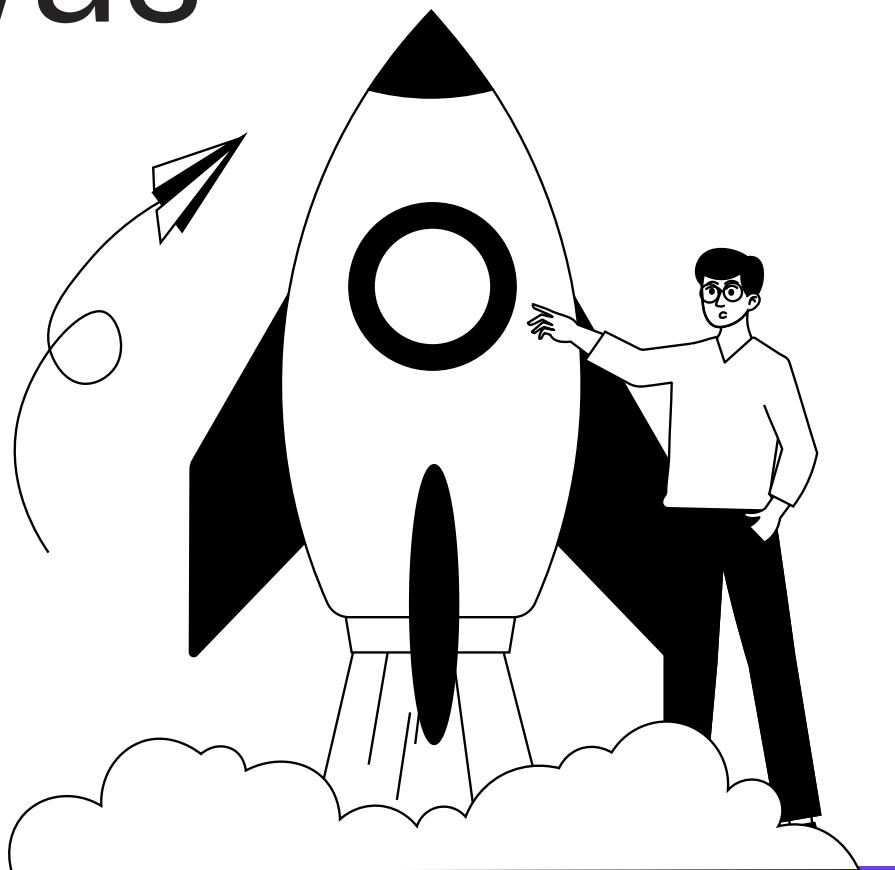

# Project Requirement:

To Build and automate Power BI  
reports for the Payroll department  
and accounts.

# Challenges :

Data was in raw format and it was scattered in different location.

# Solution offered

---

Build and automated through which the company was able to reduce 20 man-hours of data cleansing and creating reports in Excel every month.

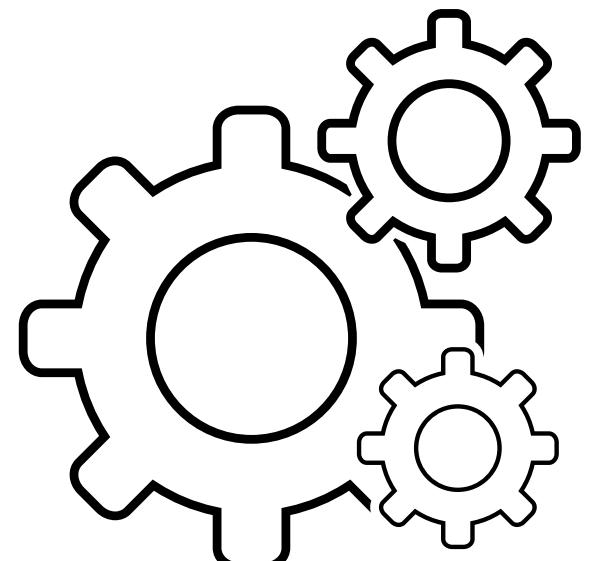

- Staff Payroll Cost Report
- Labour Payroll Cost Report

- Created PBI reports for Commercial – Commercial Director
- Payment Application, Certification, and Payment Report
- Staff Cost Monitoring report, Cash Flow report, and Budget vs Forecast report
- Requirement Analysis and data modeling in Power BI.

# **PROJECT NAME: COMPARISON ANALYSIS**

**CLIENT: CXX**

**DATABASE: IOT STREAMING SENSOR DATA, AZURE SQL DW, SAP HANA**

**TOOLS: POWER BI, POWERAPPS, MICROSOFT FLOW**

# **Project Requirement:**

To gather and Analysis the real time dashboards and other reports by interacting with client.

# **Challenges:**

To get the real time data while interacting with the client.

# Solutions Offered:

---

- Proof of concepts on Real-time dashboards
- Used Azure Event Hubs, and Azure Stream Analytics Job
- To show the real-time streaming data in Power BI service.
- Requirement gathering for real-time
- Dashboards and other reports by interacting with clients
- Requirement Analysis and modeling of data in Power BI for real-time dashboards and other reports
- Worked on Azure Analysis service for Fact and dimension modeling.

**Client Name:** Standard Chartered Bank  
(Scope International)

**Database:** SQL Server DB, Azure SQL DB

**Tools :** Power BI, PowerApps, Microsoft Excel

# **Project Requirement:**

---

To manage and create reports of banking data for customer and bank.

# **Challenges:**

---

Data size was very huge and it was real time data display.

# Solution offered

- Imported data from SQL Server DB, Azure SQL DB to Power BI to generate reports.
- Created Dax Queries to generated computed columns in Power BI.
- Generated computed tables in Power BI by using Dax.
- Involved in creating new stored procedures and optimizing existing queries and stored procedures.
